List of Contents

NUMBER 1

Minimum-fuel, power-limited transfers between coplanar elliptical orbits
Christine M. Haissig, Kenneth D. Mease and Nguyen X. Vinh 1

On the control of a class of flexible manipulators using feedback linearization approach
V. J. Modi, F. Karray and J. K. Chan 17

Strategy for the economical removal of numerous larger debris objects from Earth orbits
P. Eichler and A. Bade 29

Arcjet thrusters
A. S. Koroteev, V. V. Blagov and M. A. Lomovtsev 37

Turbojet-type engines for the airbreathing propulsion of reusable winged launchers
J. L. Duparcq, E. Hermant and D. Scherrer 41

Buoyant convection of low Prandtl number melts in horizontal boat configuration
R. Kuhl and H. Wilke 51

Test of specific methods for reduction of spectral dimension of ocean remote sensing data
A. Neumann, G. Zimmermann, H. Krawczyk and T. Walzel 61

EX MUNDO ASTRONAUTICO
In Memoriam—Luigi G. Napolitano
Rodolfo Monti 67

NUMBER 2

The optimal LQR digital control of a free-free orbiting platform
Aprille J. Ericsson, Peter M. Bainum and Xing Guangqian 69

Microgravity environment dynamic disturbances
D. Eilers, B. Kotzias, S. Portigliotti and H. Stark 83

Characterization of mechanical behaviors of advanced thermoplastic composite after impact
C. L. Ong and Y. Y. Liou 99

Advanced thrust chamber materials for Earth storable bipropellant rocket engines
R. Carl Stechman 109

Development of the Ariane 5 upper stage
H. Holsten 117

Space freighters for the 21st century
H. H. Koelle 121

Prevention of space flight induced soft tissue calcification and disuse osteoporosis
Victor S. Schneider, Adrian LeBlanc and Carolyn L. Huntoon 139

Technology transfer: the key to successful space engineering education
L. S. Fletcher and R. H. Page 141

EX MUNDO ASTRONAUTICO
List of Reviewers 147

NUMBER 3

Geosynchronous satellites at sub-synchronous altitudes
Krishna Kumar 149

Satellite despinning control in the equivalent axis frame
Theresa W. Long 153

Centralized, decentralized, and independent control of a flexible manipulator on a flexible base
Feiyue Li, Peter M. Bainum and Jianke Xu 159

Passive stabilization of a tethered system in low Earth orbit
Andrea Cotellessa and Guido de Matteis 169

Advantages and drawbacks of boron-fueled propulsion
Alon Gany and Yaakov M. Timnat 181

Thermal transport in a pure fluid near the critical point
N. Djennaoui, F. Heraudeau, P. Guenoun, D. Beysens and B. Zappoli 189

The RADARSAT Synthetic Aperture Radar payload
D. G. Zimcik, P. Naraine and I. Ferguson 195

EMATS, a robot-based Equipment Manipulation and Transportation System for the Columbus Free Flying Laboratory
P. Putz, G. Colombina and W. De Peuter 205

A strategy for identification and development of safety critical software embedded in complex space systems
Jürgen Wunram 213

European opportunities for astronomical, solar–terrestrial and Earth observation research aboard the Space Station Freedom
Manfred Gaida, Horst Blume and Ian Thomas 223

ACADEMY TRANSACTIONS NOTE
A reply from Earth: just send them the encyclopaedia
Jean Heidmann 233

NUMBER 4

The restricted $P+2$ body problem
D. J. Scheeres and N. X. Vinh 237

Optimal explicit terminal guidance for a launch vehicle
R. Vijaya Vittal and M. Seetharama Bhat 249

Newtonian and hypersonic flows over oscillating bodies of revolution—I. Circular cones
Hamdi T. Hemdan 263

Development status of the Vulcain thrust chamber
E. Kirner, D. Thelemann and D. Wolf 271

JEM Electrical Power System architecture
Takehiko Kato 283

Numerical simulation of surface tension driven flows in liquid bridges
L. G. Napolitano,* A. Viviani and D. Castagnolo 291

The electrodynamic and hydrodynamic phenomena in magnetically-levitated molten droplets—II. Transient behavior and heat transfer considerations
Jin-Ho Zong, Benqiang Li and Julian Szekely 305

The American Mobile Satellite System
François Giorgio 313

Assembling a space station in orbit
Vince D. Brand, J. Michael Lounge and David M. Walker 317

NUMBER 5

Takeoff and landing analysis methodology for an airbreathing space booster
H. Cheng, R. V. Grandhi, W. L. Hankey and P. J. Belcher 325

Equilibrium configurations in a tethered atmospheric mission
Silvio Bergamaschi and Fabrizio Bonon 333

Optimal three-dimensional heliocentric solar-sail rendezvous transfer trajectories
P. V. Subba Rao and R. V. Ramanan 341

Numerical results of simplified dynamic analyses on large imperfect space structures
Huba Oery, Andreas Rittweger, Ernst Hornung and Herbert Ludwig 347

Newtonian and hypersonic flows over oscillating bodies of revolution—II. Parabolic bodies
Hamdi T. Hemdan 363

Calculations and experiments concerning lifting force and power in TEMPUS
J. H. Zong, J. Szekely and G. Lohofer 371

An aluminum salvage station for External Tanks of the Space Shuttle
C. Spenny, D. Van Matre, J. Haislip, R. Linscott, W. Raynes and M. Skinner 379

Verification of Space Station Freedom elements and systems
George D. Hopson and Richard L. Grant 399

ACADEMY TRANSACTIONS NOTE
Use of satellites for T.V. broadcasting in the former Soviet Union
A. M. Varbansky 407

NUMBER 6

An odyssey for the turn of the millennia
Douglas A. O'Handley and Arnold D. Aldrich 411

Input–output linearization, zero dynamics stability and nonlinear control of space station
Theodore C. Bossart and Sahjendra N. Singh 417

Dynamics and control of a space station based Tethered Elevator System
V. J. Modi, S. Bachmann and A. K. Misra 429

Analysis of auxiliary propulsion systems with a separate source of energy
F. S. Costa and J. A. Carvalho Jr 451

Two-phase flow behavior in a spiral tube under microgravity
H. Yamada, T. Nakamura and O. Muragishi 461

International lunar base and lunar-based power system to supply Earth with electric power
David R. Criswell and Robert D. Waldron 469

ACADEMY TRANSACTIONS NOTES
John V. Breakwell: astrodynamicist and friend
Jozef C. Van der Ha 481

John Breakwell, the restricted problem, and halo orbits
K. C. Howell and R. W. Farquhar 485

John V. Breakwell and Optimization
J.-P. Marec 489

NUMBER 7

Optimal trajectory for vertical ascent to geosynchronous Earth orbit
Jeng-Shing Chern and Zuu-Chang Hong 497

Receding horizon feedback control law for a large space hoop-column antenna
Peter Bofah and Ajit K. Choudhury 503

An evaluation of the implementation of transportation systems with unconventional propellants
M. Thierschmann, L. Lassmann and R. E. Lo 511

Applications of advanced composites for satellite packaging for improved electronic component thermal management
John Glatz and D. L. Vrable 527

Development of structural composite mirror technology for submillimeter space telescopes
R. E. Freeland and R. D. Johnston 537

Solidification of silver–germanium alloys in an amorphous matrix aboard the space station Mir
A. Bewersdorff, G. P. Görler, G. Otto, K. Wittmann, C. Barta, F. Fendrych and A. Triska 547

VHP: an environment for the remote visualization of heuristic processes
Stuart L. Crawford and Barry M. Leiner 553

Micro-technology for planetary exploration and education
David P. Miller and Giulio Varsi 561

A space transfer vehicle for lunar missions
Dana Andrews, Tim Vinopal and Cynthia Frost 569

NUMBER 8

SPECIAL ISSUE

SPACE BIOLOGY AND MEDICINE
EARTH ORBIT AND EXPLORATION MISSIONS

Selected Papers Presented at the
42nd Congress of the International Astronautical Federation
Montreal, Canada, 7–11 October 1991

Preface
B. F. Lujan and H. M. Wegmann xi

SPACE FLIGHT EXPERIMENT RESULTS

Main medical results of extended flights on space station Mir in 1986–1990
A. I. Grigoriev, S. A. Bugrov, V. V. Bogomolov, A. D. Egorov, V. V. Polyakov, I. K. Tarasov and E. B. Shulzhenko 581

Comparison of treatment strategies for Space Motion Sickness
J. R. Davis, R. T. Jennings and B. G. Beck 587

RESULTS OF GROUND-BASED SIMULATION STUDIES

Pre-adaptation to shiftwork in space
A. Samel, H. M. Wegmann and M. Vejvoda 593

Evaluation of spontaneous baroreflex response after 28 days head down tilt bedrest
R. L. Hughson, Y. Yamamoto, G. C. Butler, A. Güell and C. Gharib 601

Dynamic analysis of ocular torsion in parabolic flight using video-oculography
W. Teiwes, A. H. Clarke and H. Scherer 607

Human locomotion and workload for simulated lunar and Martian environments
Dava J. Newman and Harold L. Alexander 613

Effects of unilateral selective hypergravity stimulation on gait
M. Lazerges and P. Bessou 621

Planetary quarantine in the solar system. Survival rates of some terrestrial organisms under simulated space conditions by proton irradiation
J. Koike and T. Oshima 629

LIFE SUPPORT CONSIDERATIONS FOR LONG-TERM SPACE FLIGHT

Medical concerns for exploration-class missions
Donald F. Stewart and Barbara F. Lujan 633

The first "space" vegetables have been grown in the "SVET" greenhouse using controlled environmental conditions
T. N. Ivanova, Yu. A. Bercovich, A. L. Mashinskiy and G. I. Meleshko 639

CELSS nutrition system utilizing snails
Y. Midorikawa, T. Fujii, A. Ohira and K. Nitta 645

NUMBER 9

Electric propulsion: an evolutionary technology
Francis M. Curran, James S. Sovey and Roger M. Myers 651

A systems approach to the commercialization of space communications technology: the NASA/JPL Mobile Satellite Program
William J. Weber III, Valerie W. Gray, Byron Jackson and Laura C. Steele 667

An evolutionary role for small comsats†
Lorne A. Keyes 677

Determining short-wave planetary albedo from the spectral signatures of land–ocean features and albedo mapping using NOAA AVHRR data
M. B. Potdar and A. Narayana 687

Status of robotic mission studies for the Space Exploration Initiative—1991
Roger D. Bourke, William C. Dias, Matthew P. Golombek, Donna L. Pivirotto, Francis M. Sturms and G. Scott Hubbard 691

An organizational model for an international Mars mission (from the 1991 International Space University (ISU) design project)
Wilhelm Stoffel and Wendell W. Mendell 701

Design considerations for future space launchers
H. O. Ruppe 705

VELA: a space system success story
John R. London III 723

NUMBER 10/11

SPECIAL ISSUE

WORLD SPACE CONGRESS

Selected Papers Presented at the
43rd International Astronautical Federation Congress
Washington, D.C., U.S.A., 28 August–5 September 1992

Preface Rodolfo Monti xi

I. THE STRATEGIES

I.1. International Space Plans and Policies

A frame of reference for extraterrestrial enterprises
H. H. Koelle 735

I.2. Economics in Space Operations

An economic benefit deriving from space activities: integration between science institutions and industry
R. Monti, M. D'Amore and L. D'Angelo 743

II. THE TECHNOLOGIES AND SYSTEMS

II.1. Materials and Structures

Impact of meteoroids and orbital debris on Hermes design
G. Ponce, P. Cocquerez and F. Meyer 749

II.2. Safety and Rescue

Making the Hubble Space Telescope servicing mission safe
N. J. Bahr and S. V. DePalo 757

II.3. Space Power

Summary of characteristics of beamed power radiation patterns and side lobe levels for the lunar solar power system
Robert D. Waldron and David R. Criswell 765

II.4. Space Propulsion

New solid propellants based on energetic binders and HNF
G. M. H. J. L. Gadiot, J. M. Mul, J. J. Meulenbrugge, P. A. O. G. Korting, A. J. Schnorkh and H. F. R. Schöyer 771

II.5. Space Systems

The ESA Polar Platform: a work-horse for future Earth Observation Missions
G. G. Reibaldi and J. L. Cendral 781

II.6. Space Transportation

Delta for the 1990s
J. F. Meyers 795

The actions of ESA to prepare for future European Space Transportation Systems
M. Delahais, J. F. Lieberherr and H. Pfeffer 805

III. THE EXPLOITATION

III.1. Satellite Communications

Anik-E2 recovery mission
D. Wang and N. Martens 811

The ITU response at WARC-92 to rapid changes in the design and use of communication satellite networks
Robert R. Bowen 817

III.2. Space Exploration

MARSNET: a precursor to the surface exploration of Mars
G. E. N. Scoon and G. P. Whitcomb 823

III.3. Space Station

Improved opportunities for the investigation of crystal growth phenomena on Space Station Freedom
M. J. Wargo 833

III.4. Microgravity Sciences and Processes

Floating zone of GaAs and effect of liquid encapsulation
J. Li, J. Sun, Z. Saghir and B. Roux 841

Direct numerical modelling of heat and mass transport in a near supercritical fluid
Bernard Zappoli and Arnaud Durand-Daubin 847

ALICE, an instrument for the analysis of fluids close to the critical point in microgravity
J.-M. Laherrère and P. Koutsikides 861

III.5. Space Activities and Society

Applying remote sensing technologies to natural disaster risk management: implications for developmental investments
B. W. Luscombe and H. M. Hassan 871

NUMBER 12

Control–structure interaction study of the proposed Space Station Freedom
V. J. Modi and A. Suleman 877

Digital control algorithms for multi-degree-of-freedom microgravity isolation systems
Y.-P. Wang and A. Sinha 893

Liquid rocket engines for large thrust: present and future
A. Sergienko 905

Robotic vision technology for space station and satellite applications
A. K. C. Wong, D. N. C. Tse, G. R. Heppler and K. Rueb 911

NASA's in-space technology experiments program: status and plans
Leonard A. Harris, Gregory M. Reck, Judith H. Ambrus and Rodney A. Hemmerly 931

Sleep in space
A. Pavy-le Traon and B. Roussel 945
